Company Profile : iWeb Technology Solutions Pvt.Ltd. is a 13 year+ Enterprise Product Software company now having its base in Mumbai, Pune & Goa with partners and projects across India, building new age, high-tech innovative products & technology IP to work on the web / cloud platform focussed on the Education (Edtech), Retail & Manufacturing verticals respectively. All these products have been indigenously developed on its technological framework Agilewiz BPMS® & BPaaS Suite respectively.

Products Profile : iWeb's Integrated Campus Management System is a holistic solution seamlessly built on Agilewiz BPMS® that can handle the entire gamut of academic and administrative activities of any University / College or School. The solution is aimed at achieving process refinement, enhanced efficiency and higher accountability throughout the university and affiliated colleges / schools, including UG, PG & PHD curriculum. The solution eliminates the redundancy of disorganized data from several isolated functional silos spread across the legacy systems or documents on personal computers and creates a single platform of validated and accurate data. This translates to the opportunity to make informed decisions within a shorter span of time. The solution enables automation of the academic administrative processes thereby reducing the time and efforts taken to achieve exemplary results. The academic and non-academic modules of the solution seamlessly available to provide end to end institutional operational automation. An end-to-end automation of processes right Pre admission, admission, Time table, Attendance, Exam, Result covering the complete Student Lifecycle Management processes along with Non-Academic areas like HR, Payroll, Purchase, Stores/Inventory, Finance & Accounting etc. offers broader opportunities to reduce cost in terms of time, resources and required personnel.

SV VETERINARY VARSITY GETS GEN NEXT SOFTWARE, BIDS ADIEU TO PAPER WORK

SVVU stands first in India to digitise its entire administration workflow and academic activity, say officials

ALL IN A CLICK
The university has signed a MoU with I-Web Technology Solutions for a period of six years. Under this integrated management system, student attendance, examinations, corrections, results, administration, staff and faculty pay, leaves are available with just a click.

From this year onwards, the university is likely to save at least ₹70 lakh by going paperless.

Microsoft with Azure cloud is the software in use for this program.

On June 9, admissions to college of Dairy Technology will have Next Gen admission process.

Even other universities under ICAR would do digital once the evaluation of Tirupati Vet University is done.

The complete information about college is now available with real time on dashboard.

EXPRESS NEWS SERVICE
@ Tirupati

IN a major leap, Sri Venkateswara Veterinary University said good bye to hectic paper work and started its workflow by going paperless on Tuesday with 'Ready to Use' software with the help of I-web Technology Solutions Pvt Ltd under the guidelines of ICAR.

SV Veterinary University is the first university in India to digitise its entire activity from ICAR sanctions to research process, student admissions to issuance of marks memo with a single unique code.

On June 9, admissions to college of Dairy Technology will have Next Gen admission process through online system. Here every officer concerned will update information and the student fee will be paid through bank account which will be synchronised with the government schemes and scholarships.

"With 10 days left for admissions process to begin, the entire university can get acquainted with the exclusively designed software and the three-day training for core group that is HODs and administrators of the university is more than sufficient," said Varsha, a techie who is training the varsity employees.

13 selected for training

"The university has selected 13 persons for understanding the new digitisation technology and its implementation," G Gangaraju, registrar, SV Veterinary University told Express. The registrar said that assistant Registrar Kiran Babu, super-

SVVU registrar G Ganagala and Varsha of I-Web Technology Solutions exchange a MoU documents in Tirupati | EXPRESS

intendents K Srikrishna, P Manohar from Administrative office, College of Vet Science and Dairy Tech, Y Marathi Dhar and T Rajsekhar, assistant professors, C Chandra Sekhar and E Raghu, NTR Vet Science college superintendent Gannavarum, K Sudhakar and G Bharathi, from Proddutur College; G Dileep Reddy and R Harshvardhan from Muthukur Fishery Sci-

ence College, admin officers K Sravanji and P Narasa Raja are taking the key training as coordinators.

"Now all the data will be uploaded into this program. From July 15, no paper work will be allowed," said Gangaraju. According to a study, from this year onwards, the university will save at least ₹70 lakh on paper and stationery. The university has signed a MoU with I-Web Tech-

nology Solutions for a period of 6 years. Under this integrated management system, the tech partner providing a auto registration of the constituent colleges and affiliated institutions with the University.

Premium Model, free of cost

Student attendance, examinations, corrections, results, administration, staff and faculty management of pay, leaves and other parent tracking system from attendance to marks and progress is available with just a click. "This premium model from 'I-web' company totally free of cost," said Gangaraju.

"Experiment to digitise administration, may be extended after evaluation of Tirupati Vet University, all the universities in the country under ICAR," sources said.

"The complete college information is now available with real time on dashboard which will provide concerned officials such as VC, Registrar and others," said Varsha as added that file tracking, document management will also be digitise Microsoft with Azure cloud is the software in use for this program.

The registrar also explained that the I-web Tech Solutions a aim is digitise all universities keeping mind PM Narendra Modi's Digital India mission wherein a student who is just becoming a major will get a digital bank account to pay fees, fill his admission form (upload software) and see his attendance and enroll to the courses of the university & affiliated colleges using mobile apps.

CC Now all the data will be uploaded into this program and from this academic year the varsity administration is doing away with paper work. The premium model software from 'I-web' company is being offered free of cost.

G Ganagala, SV Veterinary University registrar

SVVU to go cashless soon

OUR BUREAU

Tirupati: Sri Venkateswara Veterinary University (SVVU) going to become a cashless and paperless varsity soon. It will become the first university under the Indian Council of Agricultural Research (ICAR) to do so. The SVVU Registrar Gangaraju said that varsity has signed up with iWeb Technologies Private Ltd to implement an end-to-end smart cashless & paperless solution to be implemented across the campus which will run on the Microsoft Cloud Azure and the entire fee collection and student account handling will be managed by RBL Bank Ltd. iWeb Technologies Pvt Ltd spoke to few universities under the ICAR but it was the dynamism of SVVU stakeholders and management

SVVU Registrar Gangaraju receiving the agreement papers from iWeb Technologies Pvt Ltd personnel in Tirupati on Saturday

that get them the first chance which was approved in less than a month. Students will have access to everything of the university on their mobile phones and right from form filling to student fee payment and student attendance will be available on their Mobile App.

Ingram Micro & Partners form the backbone of Maharashtra Governments' first of its kind state wide skilling program powered by Microsoft cloud: Kaushalyasetu

WHEN MINISTRY OF EDUCATION, MAHARASHTRA GOT TO learn that an estimate of 20,491 students could not clear their 10th class examination, they planned to compensate their one-year loss by offering skill-oriented training under the project 'KaushalyaSetu'. The course was to be conducted around 200 best Polytechnic colleges but lack of accurate data, transparency and process automation across the state of Maharashtra were some of the problems that the government faced.

It was then that iWeb Technology Solutions Pvt. Ltd., a Microsoft AEP partner, stepped in and within a short span of time turned the table with its radical solution, Education Management System Application. We handle the entire gamut of academic and administrative activities across colleges or Universities with this holistic solution built seamlessly on Agile wiz BPMS™.

We planned an integrated approach to tackle this problem

It didn't take us much time to configure that they need an automated solution that could help them to maximise strategic planning efforts and streamline the management of student services and academic services. We wanted to empower them to make informed decisions quickly and to make it happen, it was necessary to eliminate the redundancy of disorganized data and create a single platform of validated and accurate data.

We chose to stand out by doing some hardcore groundwork

It is rightly said that great work demands time and research and so does this one. To make this solution a grand success, we made the checklist first to know where exactly we need to focus. Following that, we concluded that we need to focus on three basic areas:

- Developing the dashboards for minister, regional head, college/centre head, student, trainers, and parents
- Program maintenance
- Program courses maintenance

The plan was easier said than done. To simplify this Herculean task, we spread it out evenly to make sure it meets all the winning criteria.

- Each district representative was ordered to visit colleges and handover the manual of IUMS & training, gather data (names of faculty and which subject they teach, names of classrooms/labs, timetable for classes), to verify the infrastructure, analyse the readiness of students and get the MoU signed.
- To add college in system we decided to create new role of college coordinator, define operational district for each coordinator and maintain colleges in his district only.
- To add programs in college we had options to either insert the offering period when program is added in college or insert course instance at the same time.
- We made timetable of colleges in consultation with college admin/staff.
- Imported student data obtained from SSC board with college & program already set.
- Made sure that student goes to assigned college.
- Made sure that fee payment is rightly handled by college admin.
- Made attendance marking and teaching compulsory.

- Made sure that marks are entered after the exam has been done.
- To print/publish result timely along with certificates and mark sheets.

We put cloud to work for public good with Microsoft and Shreyas Technosoft Pvt. Ltd.

To offer end-to-end student plus institute management in all 200 colleges and around 60,000 students, we are glad to get the support from Microsoft and Shreyas Technosoft Pvt. Ltd.

Microsoft's local cloud services from their India Datacenter Pune and Mumbai enabled agility for the program. It helped the team to deploy the solution with greater efficiency especially in managing sudden spike in traffic and with the competitive rates offered, it helped us convince our stakeholder to adopt Microsoft Cloud Services for seamless functioning.

Shreyas Technosoft Pvt. Ltd. was our marketing and implementation/support partner that helped rolling out this solution state wide in Maharashtra. It assisted us to do installation at all places free of cost while offering support for all the 200 sites.

We delivered numerous benefits

- Streamlined and automated the entire operation of this program run by the Government.
- Gave them real time data .
- Provided various reports & in the form of dashboards like Student Enrolled, Course completed, Registration status, student as well as staff attendance.
- Eliminated the redundancy of disorganized data from several isolated functional silos spread across the legacy systems or documents on personal computers and created a single platform of validated and accurate data.
- Offered them the opportunity to make informed decisions within a shorter span of time.
- Enabled automation of the academic administrative processes thereby reducing the time and efforts taken to achieve exemplary results.
- Offered broader opportunities to reduce cost in terms of time, resources and required personnel.

The customer has a single touchpoint and iWeb along with Shreyas and Ingram Micro (CSP) are working jointly with them. We look forward to have strong business ties with them going forward.

iWeb's Academic modules covers the Student enrolment, Fee, Admission, Timetable, Attendance & Examination Modules and it has been implemented for the entire state covering around 60,000 students with over 200 polytechnics across Maharashtra.
